

Activitat Buffer - The Little Prince

- Crea un directori de nom **IO**.
- Crea un **package** de nom **buffered** ubicat dins del directori **IO**.

1. Buffered classes

Utilitza les classes

FileReader

FileWriter

FileInputStream

FileOutputStream

BufferedReader

BufferedWriter

BufferedInputStream

BufferedOutputStream:

```
package buffered;
public class BufferTest {
    public static void main(String[] args) {

        //Instantiate class FileBuffer

        //Read file thelittleprince.txt using BufferedReader

        //Count lines of file thelittleprince.txt using BufferedReader

        //Copy thelittleprince.txt file to new file thelittleprince-copy.txt
        //using BufferedOutputStream

        //Write String into thelittleprince-copy.txt using BufferedWriter
        //"\\nThis is the end of the book.\\nThanks for Reading it."

        //Copy prince.jpg file to new file prince-copy.jpg using BufferedOutputStream
    }
}
```

```
package buffered;
public class FileBuffer {
    /**
     * @param file: path of the file to read
     * @return String containing the file read
     */
    public String read(String file) {
        //TODO
    }
    /**
     * @param file: path of the file to read
     * @return the number of lines of file
     */
    public int countLines(String file) {
        //TODO
    }
    /**
     * @param text: String to add at the end of the file
     * @param file: path of the file to read
     */
    public void write(String text, String file) {
        //TODO
    }
}
```

```
    }  
    /**  
     * @param readFile: path of the file to read  
     * @param writeFile: path of the file to write  
     */  
    public void copyByte(String readFile, String writeFile) {  
        //TODO  
    }  
}
```
